Committee on _____

A BILL

To direct the Secretary of Agriculture to remove non-ambulatory pigs from the United States food system, to establish an online portal for confidential complaints, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) SHORT TITLE.—This Act may be cited as the
5 “Pigs and Public Health Act”.

6 (b) TABLE OF CONTENTS.—The table of contents for
7 this Act is as follows:

- Sec. 1. Short title; table of contents.
Sec. 2. Findings.
Sec. 3. Definitions.

TITLE I—HUMANE HANDLING REFORMS FOR NONAMBULATORY
PIGS

- Sec. 101. Unlawful use of drugs contributing to nonambulatory conditions.
Sec. 102. Transportation of pigs.
Sec. 103. Unlawful slaughter practices involving pigs.
Sec. 104. OSHA standard and staffing requirement.

TITLE II—PUBLIC HEALTH TRANSPARENCY

- Sec. 201. Online portal for confidential complaints.
Sec. 202. Whistleblower protection.
Sec. 203. Study and report on threat of nonambulatory pigs in food system.

1 SEC. 2. FINDINGS.

2 Congress finds the following:

3 (1) Humane euthanization of nonambulatory
4 pigs—

5 (A) prevents needless suffering;

6 (B) results in safer and better working
7 conditions for individuals handling pigs;

8 (C) brings about improvement of products
9 and reduces the likelihood of the spread of
10 zoonotic and other diseases that have a great
11 and deleterious economic impact; and

12 (D) protects the public health of con-
13 sumers by ensuring that products from non-
14 ambulatory pigs do not enter the food supply.

15 (2) Many nonambulatory pigs are ill and may
16 carry dangerous pathogens, posing a serious public
17 health risk, considering—

1 (A) in a 2008 study, significantly more
2 nonambulatory pigs than control pigs tested
3 positive for swine influenza viruses H1N1 and
4 H3N2;

5 (B) other studies have indicated that non-
6 ambulatory pigs may increase risk of trans-
7 mission of pathogens such as Salmonella and
8 Yersinia enterocolitica and may be more likely
9 to harbor antibiotic-resistant Campylobacter;
10 and

11 (C) the Centers for Disease Control and
12 Prevention estimates that pork containing
13 pathogens leads to about 525,000 infections,
14 2,900 hospitalizations, and 82 deaths in hu-
15 mans each year.

16 (3) Industrial operators have created a system
17 that allows for the inhumane handling of non-
18 ambulatory livestock that causes needless suffering,
19 unsafe working conditions, and the spread of
20 foodborne and zoonotic diseases.

21 (4) Industrial operators have abused the use of
22 certain drugs that increase the risk of pigs becoming
23 nonambulatory.

1 (5) Current Federal animal transport laws are
2 ineffective, inherently cruel, and cause pigs to be-
3 come nonambulatory.

4 (6) Employees and contract laborers on farms,
5 during transport, and at slaughter deal with non-
6 ambulatory pigs first hand, making them uniquely
7 positioned to report public health threats they wit-
8 ness.

9 (7) Since 2004, the Department of Agri-
10 culture's Food Safety and Inspection Service has
11 banned all nonambulatory cattle from entering the
12 Nation's food supply due to increased risk of disease
13 spread, but there are no such regulations for other
14 species.

15 (8) In 2002, Congress mandated that the De-
16 partment of Agriculture release a report regarding
17 nonambulatory animals, but no such report has been
18 released. The Department of Agriculture released a
19 report on nonambulatory cattle and calves in 2005
20 and a report on sheep and goats in 2006. No report
21 has been issued on nonambulatory pigs.
